“Hail, Hydra! Immortal Hydra! We shall never be destroyed! Cut off a limb, and two more shall take its place! We serve none but the Master—as the world shall soon serve us! Hail Hydra!” — The Hydra Oath

Welcome to *The Rise of Red Skull*! This campaign expansion comes with five new scenarios that tell the story of Hydra’s rise to power, as well as two new heroes who fight to restore freedom to the oppressed.

Each of the five new scenarios in this expansion features a new villain: Crossbones, Absorbing Man, Taskmaster, Zola, and Red Skull. Each scenario has its own page in this rulebook.

**SET SYMBOL**

Cards from *The Rise of Red Skull* expansion can be identified by this set symbol:
CAMPAIGN MODE RULES

Campaign mode combines all five scenarios in *The Rise of Red Skull* expansion into one epic experience where the outcome of each game impacts the next scenario. To complete the campaign, the players must win all five scenarios in numerical order, starting with scenario #1 – Crossbones and ending with scenario #5 – Red Skull.

To begin a campaign, the players start by choosing their heroes. Each player must use their chosen identity for the entire campaign, but they are free to change aspects and alter the contents of their deck following the deck customization rules in the *Marvel Champions* Rules Reference between scenarios.

To play a scenario in campaign mode, set up the scenario as per the normal rules of the game. Then, follow that scenario’s setup instructions in the order in which they are listed in the Campaign Instructions.

When the game ends, if the players won, follow that scenario’s victory instructions in the order in which they are listed in the Campaign Instructions. If the players lost, they may reset the scenario and try again with no penalty.

CAMPAIGN LOG

The campaign log found on the back cover of this rulebook tracks the progress of the entire campaign. At the end of each scenario, the players record their results by entering the required information in the campaign log.

A printable copy of the campaign log may be found on our support page at:

CARDS ADDED TO DECKS

During a campaign, cards can be added to players’ decks as part of a scenario’s victory instructions. When a card is added to a player’s deck this way, write that card’s title in the matching field of the campaign log.

Added cards must be included in the player’s deck for the rest of the campaign. Cards added to the deck as part of a campaign do not count toward a player’s minimum or maximum deck size.

Campaign-Only Cards

This card is Basic but also Campaign Only.

Cards 155–162 are player cards that were created specifically for use in *The Rise of Red Skull* campaign. These cards cannot be included in any player’s deck unless they are playing *The Rise of Red Skull* campaign and the players were directed to add them to their decks by the Campaign Instructions.

EXPERT CAMPAIGN

For players who want a more challenging campaign experience, *The Rise of Red Skull* expansion comes with everything you need to play an expert campaign. The rules for this alternate play format are found on page 17.

> Some setup and victory instructions are preceded by Expert Campaign Only. Players should ignore these instructions unless they are playing an expert campaign.

**VICTORY:**
- Each player chooses one of the **TECH** upgrades from the Hydra Campaign set and adds it to their deck.

The Hydra Assault and Weapon Master sets can be removed from this scenario and/or added to other scenarios when using the scenario customization rules.

**EXPERIMENTAL WEAPONS DECK**

The setup instructions on Attack on Mount Athena 1A instruct the players to create the Experimental Weapons deck. To do this, take all four cards in the Experimental Weapons encounter set, shuffle them together, and set them facedown next to the main-scheme deck. This is the Experimental Weapons deck. After a card from the Experimental Weapons deck enters play, it is considered to be part of the encounter deck. When that card is discarded, it is placed in the encounter deck discard pile.

- Record the name of each **EXPERIMENTAL** attachment that entered the game in the campaign log.

- **Experimental Weapon**
  Attach to the villain.

- **Expert Campaign Only:** Record each identity’s remaining hit points in the campaign log, as well as any cards added to their deck.
SCENARIO #2 - ABSORBING MAN

Villain Deck: Absorbing Man (I), Absorbing Man (II)
Remove Absorbing Man (I) and add Absorbing Man (III) for expert mode.

The Hydra Patrol set can be removed from this scenario and/or added to other scenarios when using the scenario customization rules.

RULES CLARIFICATION

Q. When I put an environment card into play at the beginning of the Absorbing Man scenario, do I trigger the surge keyword?
A. No. The surge keyword only triggers when the card it appears on is revealed. Putting a card into play is not the same as revealing a card.

» Shuffle each Experimental attachment recorded in the campaign log into the encounter deck.

» Expert Campaign Only: Set each player’s hit points to their remaining hit point value recorded in the campaign log for the previous scenario.

» Expert Campaign Only: Each player may add 1 random obligation from their expert campaign set to their deck to heal their identity to its full hit point value.

» Each player may choose one of the “Basic” Condition upgrades in the Campaign set, attach it to their identity, and add it to their deck in the campaign log.

Expert Campaign Only: Record each identity’s remaining hit points in the campaign log, as well as any cards added to their deck.

RULES CLARIFICATION

Q. What happens when I reveal Shadow of the Past and my nemesis minion has the same title as an enemy in play?
A. Your nemesis minion cannot enter the game in this instance, so it will remain set-aside and does not enter the game. However, you still reveal your nemesis’ side scheme and shuffle the rest of your nemesis’s set into the encounter deck. This will cause Shadow of the Past to gain surge as dictated by the card.
**SCENARIO #4 - ZOLA**

**Villain Deck:** Zola (I), Zola (II)

Remove Zola (I) and add Zola (III) for expert mode.

**Main Scheme Deck:** The Island of Dr. Zola, The Mad Doctor

**Encounter Deck:** Zola set, Under Attack set, and Standard set. (The Under Attack and Standard sets can be found in the *Marvel Champions* core-set.)

The Under Attack set can be removed from this scenario and/or added to other scenarios when using the scenario customization rules.

**RULES CLARIFICATION**

**Q.** What does it mean when a card is removed from the campaign log?

**A.** When a card is removed from the campaign log, cross it out of the campaign log. That card is no longer part of the campaign and cannot be included in any deck for the remainder of the campaign.

**Q.** If my ally is removed from the campaign at the end of Zola’s scenario, what do I do?

**A.** If your ally was removed from the campaign, that ally is removed from your deck for the rest of the campaign. If this causes your deck to fall below the minimum number of cards, then you must add a card to your deck.

**CAMPAIGN INSTRUCTIONS**

**SETUP:**

- Each player searches their deck for all cards with the setup keyword and puts them into play.
- Shuffle each *Experimental* attachment recorded in the campaign log into the encounter deck.

**Expert Campaign Only:** Set each player’s hit points to their remaining hit point value recorded in the campaign log for the previous scenario.

**Expert Campaign Only:** Each player may add 1 random obligation from their expert campaign set to their deck to heal their identity to its full hit point value.

**VICTORY:**

- Each player engaged with an enemy records they are engaged with an enemy in the campaign log.
- If the Hydra Prison side scheme is still in play, record the name of each ally underneath it in the campaign log. Those allies cannot be included in any deck for the remainder of the campaign.
- If the Hydra Prison side scheme is not in play, each player in hero form may replace their “Basic” *Condition* upgrade with its “Improved” side.

**Expert Campaign Only:** Record each identity’s remaining hit points in the campaign log, as well as any cards added to their deck.
The side-scheme deck has its own discard pile. When a side-scheme is defeated or otherwise discarded, place it in the side-scheme discard pile. If the side-scheme deck is ever empty, shuffle the side-scheme discard pile into the side-scheme deck. There is no penalty for doing this.

**CAMPAIGN INSTRUCTIONS**

**SETUP:**

- Each player searches their deck for all cards with the setup keyword and puts them into play.
- Shuffle each *Experimental* attachment recorded in the campaign log into the encounter deck.
- Place X threat counters on the main scheme, where X is the number of delay counters recorded in the campaign log. (Place XΩ instead if you are playing an expert campaign.)
- **Expert Campaign Only:** Set each player’s hit points to their remaining hit point value recorded in the campaign log for the previous scenario.
- **Expert Campaign Only:** Each player may add 1 random obligation from their expert campaign set to their deck to heal their identity to its full hit point value.
- **Expert Campaign Only:** Each player who was recorded as being engaged with an enemy deals themselves an encounter card.
- **Expert Campaign Only:** If the players lose this game, Red Skull conquers the world and the players lose the campaign.

**SIDE SCHEME DECK**

The Setup instructions on The Rise of Red Skull 1A instructs the players to create the side-scheme deck. To do this, search the encounter deck for each side scheme and shuffle them together into their own deck. This is the side-scheme deck. Set it next to the main-scheme deck.

**VICTORY:**

- Hydra is defeated and the players win the campaign! Turn the page to read the conclusion.
EXPERT CAMPAIGN RULES

For players who want a more challenging campaign experience, The Rise of Red Skull expansion comes with everything you need to play an expert campaign.

EXPERT CAMPAIGN SET

There are four encounter sets labeled “Expert Campaign Set.” Each set contains the same four obligation cards with player-card backs. These cards can be added to a player’s deck during a campaign.

At the beginning of a campaign, each player is assigned a number from 1 to 4 in the campaign log. Each Expert Campaign Set is also numbered from 1 to 4. When a player is instructed to add a card from their expert-encounter set to their deck, they must take that card from the set that matches their player number.

If a player is defeated during a scenario that their teammates go on to win, the defeated player does not participate in any of the victory steps for that scenario. However, they can rejoin their teammates for the next scenario by adding an obligation to their deck during setup to restore their identity to full hit points.

OBLIGATIONS IN PLAYER DECKS

The obligations in the expert campaign sets have player-card backs because they are meant to be added to player decks, but they are still encounter cards.

When a player draws an obligation from their deck, they must immediately put that card into play in their play area. They do not draw a card to replace that obligation.

These obligations represent the consequences of a player’s choices. As a result, only the player with the obligation in their play area can use its Alter-Ego Action to deal with that card.

PERSISTENT DAMAGE

While playing The Rise of Red Skull campaign at the expert level, each player must record their remaining hit points in the campaign log after they win a game. This determines each player’s starting hit points for the next scenario. If a player’s remaining hit point value is higher than their base hit point value, record their base hit points in the campaign log instead.

The setup instructions for each scenario offer players the opportunity to restore their identity to their full hit point value by adding an obligation from their expert-campaign set to their deck.
STARTER DECKS
These preconstructed decks and character introductions are intended for the player who wants to immediately play the game without customizing their own deck.

HAWKEYE / LEADERSHIP
Once Hawkeye sets his sights on a foe, he never misses. Use Clint Barton’s alter-ego ability to get Hawkeye’s Bow into play on your first turn, then use the Bow to fire arrows each round. Shoot an Electric Arrow to stun an enemy, or fire off an Explosive Arrow to decimate the villain and all the minions attacking you!

Hawkeye has deadly accuracy, but he is low on hit points and defense. Take advantage of the leadership cards in his deck to recruit powerful Avenger allies like Black Knight and Goliath. Use your allies to defend enemy attacks while Hawkeye defeats the villain!

As Spider-Woman, she uses her Superhuman Agility to increase her stats each time she plays a card belonging to a different aspect. Boost her THW and ATK as high as you can before exhausting her to thwart or attack. Then, play Self-Propelled Glide to ready her and do it again!
